

HERO® PAVABALL

IMPACT OPTIMIZED DEFENSE

DESCRIPTION

PavaBall is a less-lethal¹ projectile containing lab quality, powdered PAVA, a synthetic form of capsaicin.

Comprised of a durable outer wax shell, PavaBall fractures apart on impact. The powder inside aerosolizes into a 3-6 foot cloud of powerful irritant. Targets are instantly engulfed, experiencing debilitating burning sensations, temporary blindness, and difficulty breathing. These effects last up to an hour, giving the user time to escape and seek help.

PavaBall maintains reliability when stored between 32-100° F and remains effective for up to two years. Available in active and trainer rounds.

¹When properly used as described by the manufacturer.

²Joules adjusted based on location restrictions and requirements.

SPECIFICATIONS

CALIBER	.680
WEIGHT	3.1 GRAMS
PAYLOAD	10% PAVA
KINETIC	9.29 or 14.51 J²
FORMULA	PAVA Powder
SHELF LIFE	2 YEARS
SHELL SEAM	PRESSURE FIT
TEMPERATURE	32° TO 100°f
PAVACLOUD	3-6 FEET
